

LSS

DNPmobile

LSS DNPmobile is a mobile stage manager's desk. The user interface is designed for the Microsoft Surface 6 Pro tablet PC with a 12.3-inch PixelSense™ display. It can either be integrated into the network via WLAN or via a wired USB C-to-Ethernet adapter.

Within a WLAN network, the LSS DNPmobile is independent of location and enables free work. Dim and NonDim circles as well as rehearse, blue and way lights can be switched and monitored directly from the auditorium, the upper machinery or the stage with the tablet. Or wherever you want.

The user interface of the LSS DNPmobile is exactly tailored to the project, as with the stationary devices. Depending on your requirements, graphical displays of electrical measurements, last users of switches, faders and much more can be displayed in the user interface.

The Microsoft Surface Pro 6 is a powerful tablet PC. Equipped with a powerful battery and Windows 10, it is the perfect base for the LSS DNPmobile.
