# LSS

Patch Panel

The LSS Patch Panel is a non-populated carrier for up to 24 Keystone modules for 19 '' rack systems. In the stainless steel module holder, the modules can be locked individually. To protect against dust, the contacts of RJ45 modules are overhead. The module fields are numbered on the blue powder-coated front panel. Individual labels can be attached above the module fields. On the back the Patch Panel has a cable clamp for each module for optimal strain relief and cable management. The carrier consists of sheet steel with a potential equalization connection. The modules are automatically grounded when engaged. Dust covers in black are available as accessories.

Technical Specifications:

Design	19 '' slot with 1 U
Max. number of keystone modules	24, can be equipped individually RJ45 contacts overhead
Max. height of labels above plug connector	12mm
Material	sheet steel
Front panel	Blue powdered
Electrically isolation	200mm grounding cable enclosed
RoHS	Approve
Dimensions (W x H x D)	482,6 x 44,05 x 101,5 mm
Weight	700g unpopulated
Optional accessories	Dust covers, black
Order number	L03012
