## Lss

# PowerSwitch 2 6x20A 16DI/16DO <br> DMX/Profibus-DP actuator, RDM ready, current monitoring and digital interface 

LSS PowerSwitch $26 \times 20 \mathrm{~A}$ 16DI/16DO is a 6 channel relay actuator with digital interfaces for electrical devices and sensors. Up to 16 devices ( $24 \mathrm{~V} \mathrm{DC} / 500 \mathrm{~mA}$ ) can trigger and another 16 sensor signals $(24 \mathrm{~V})$ can process by all 32 interface channels.

The actuator LSS PowerSwitch 2 6x20A 16DI/16DO has 6 relay channels. Each channel has maximum performance of $4600 \mathrm{~W} / 230 \mathrm{~V} \mathrm{AC}$ and can be triggered via DMX or Profibus-DP. An optional current monitoring for each load channel is possible. Sensors at every circuit breaker monitor the current und send feedback signals to the actuator. All these signals can be shown on a control touch panel, e.g. LSS Digital Slave Console, at light control. Circuit breakers by ABB will be approved for current monitoring.

LSS PowerSwitch $26 x 20 \mathrm{~A}$ 16DI/16DO is RDM-ready and can be remote controlled. Basic adjustments can be made directly at the device too. For this two front buttons and a sevensegment display are installed.

LSS PowerSwitch 2 6x20A 16DI/16DO is equipped with six bi-stable high performance relays. Each relay is switchable direct at the device or remote via data signal. Switch position are shown on the touch panel via RDM or directly on device.

LSS PowerSwitch $26 \times 20 \mathrm{~A} 16 \mathrm{DI} / 16 \mathrm{DO}$ is a rail-mounted device for 35 mm DIN rails.

## Technical Specifications:

General

| Lamps and display | $4 \times$ LED and seven-segment display |
| :--- | :--- |
| Allowed ambient <br> temperature | $0^{\circ} \mathrm{C}$ to $40^{\circ} \mathrm{C}$, not-condensing <br> Only when $4,0 \mathrm{~mm}^{2}$ cables are used! |
| Storage tempera- <br> ture | $-40^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ |
| Protection class | IP 20 |
| ROHS compliant | Approval |

| Approved circuit | - ABB pro M compact \& SMISSLINE with dual connector |
| :--- | :--- |
| breakers for cur- | - ABB S800 with increased opening |
| rent monitoring | - Other circuit breakers with dual connector |

| Voltage and pow- <br> er supply device | Operating voltage: <br> Operating current: <br> Standby current: | 8A DC 10A (according to loads at Digital Out) <br> $<0,15 \mathrm{~A}$ plus loads at Digital Out |
| :--- | :--- | :--- |

| Dimension <br> $(\mathbf{W} \times \mathbf{D} \mathbf{~ H})$ | $216 \times 58 \times 90,5 \mathrm{~mm}$ |
| :--- | :--- |
| Weight | 800 g |
| Installation | On 35 mm DIN rail (DIN 50022), vertical norm distance $150 \mathrm{~mm}, 12 \mathrm{HP}$ |
| Order number | 5348 |

Digital Interfaces

| Connectors <br> In and Out | Each with 1x spring-cage connector PHOENIX DFMC 1,5/10-ST-3,5 |  |
| :--- | :--- | :--- |
| Connection | Operating voltage: <br> Operating current per channel: <br> Operating current all channels: | 24 V DC <br> up to 500 mA <br> up to 8 A |
| Digital Out | Operating Voltage: <br> Switching threshold: | 24 V DC <br> up to 5 V inactive <br> from 14 V active |
| Digital In |  |  |

Relay channel and Control

| Terminal connections and conductor cross-section | Connector | Solid in $\mathrm{mm}^{2}$ | Flexible in | Ferrule in $\mathrm{mm}^{2}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Without plastic sleeve | With plastic sleeve |
|  | DMX | 0,14...1,5 | 0,14...1,5 | 0,25...1,0 | 0,25...1,5 |
|  | Power supply | 0,14...2,5 | 0,14...2,5 | 0,25...2,5 | 0,25...1,5 |
|  | Load connectors | 0,2...6,0 | 0,2...4,0 | 0,25...4,0 | 0,25...4,0 |
|  | Profibus-DP | M12-Connector |  |  |  |
|  | CMS | See ABB CMS System. |  |  |  |
| Switching capacity |  |  |  |  |  |
|  | Resistive load: up to 4600 W <br> Inductive load: up to 2000 VA <br> Capacitive load: up to $2500 \mathrm{~W}(200 \mu \mathrm{~F})$ |  |  |  |  |
| Power supply control | Operating voltage: 24 V DC <br> Operating current: $<2,0 \mathrm{~A}$ <br> Standby current: $<0,15 \mathrm{~A}$ |  |  |  |  |
